

FOR IMMEDIATE RELEASE:

NCS delivers AEW Operator Link 16 Expert Course to NATO E3-A Component

The two-week hands-on training course provided AEW operators, Communications Technicians and associated support staff an in depth understanding on a variety of subjects including Link 16 architecture, Network Design Documentation, INDE file and Network Design Documentation interpretation, Network Management, Multi TDL Planning, and OPTASK Link. The course included personnel from the United States, Canada, Italy, Belgium and Turkey. As always, this diversity contributed to a highly successful training program. NCS would like to thank personnel from the Operational Testing & Evaluation Wing who kindly hosted the training programme.

For more information on this course or any of our other training courses please see our website (www.network-centric.com).
