

**FOR IMMEDIATE RELEASE:**

### **Upgrades to Joint Range Extension Applications Protocol (JREAP) Training and New JREAP Courses**

The recent updates to the Joint Range Extension Applications Protocol (JREAP) Message Standard (MIL-STD-3011), MIL-STD-3011A (December 2010) and MIL-STD-3011B (February 2013) have greatly improved the Message Standard, requiring a complete overhaul to our JREAP training. NCS has completely updated and upgraded our JREAP Intermediate Training (JREAP / A Level-1) and added two new JREAP Training Courses.

NCS is pleased to announce the addition of JREAP Advanced (JREAP / A Level-2) and JREAP for Engineers (JREAP / A Level-3). The JREAP Advanced Training Course contains all of the material covered in the JREAP Intermediate Course with the addition of more technical level information regarding the JREAP protocols, headers, and messages. This course is suitable for operators and engineers alike. The JREAP for Engineers Training Course contains all of the material covered in the JREAP Advanced Course with the addition of in-depth information regarding X-Series Messages and the associated data elements. This course is suitable for anyone with a requirement to design, develop, test, or implement JREAP technology.
