

FOR IMMEDIATE RELEASE:

### **Link 16 and JREAP Training for Engineers**

Having delivered Link 16 Training to thousands of students, NCS recognizes that the knowledge and skills required by Link 16 engineers cannot be satisfied by most off-the-shelf training courses. With nearly 10-years of experience training Link 16 engineers, NCS is pleased to announce two new training courses developed specifically to satisfy these requirements.

The Link 16 for Engineers and Joint Range Extension Applications Protocol (JREAP) for Engineers training courses have been specifically tailored to teach the most technical aspects of these complex systems. Like all of our training courses, this training is 100% reference based and our instructors have the ability to teach to the bit-level.

If you, your staff, or your organization has a requirement to design, develop, maintain, or test Link 16 or JREAP hardware or software, this training is for you.

To register interest in this or other courses, please email [director@network-centric.com](mailto:director@network-centric.com) or visit [www.network-centric.com](http://www.network-centric.com).
